Juan Pablo Solorzano Mendoza

Republica de Paraguay • Colima, 28047 • juanpablod3v@gmail.com • +52 312 218 5104

Education

Universidad de Colima Coquimatlán, COL
Degree, Computer Systems Engineering. June 2010
Relevant Coursework: Microsoft Certified: Azure Fundamentals , Web Application Developer (APTECH), Language C: Algorithmic, PHP Basic, Java Basic

Bachillerato Tecnico #1 (Universidad de Colima) Colima, Col
Programmer Analyst July 2005

Experience

TCS Remote
Developer Sept 2022 – Current

- Develop new requirements and fix incidents in a full-stack internal application for a major insurance company to manage the end-to-end lifecycle of corporate software requests, approvals, reviews and resolutions.
- Leverage AI-driven development tools (GitHub Copilot) to accelerate code generation, optimize debugging process and enhance technical documentation.
- Expand serverless backend solution using Nodes.js, Express and AWS lambda to handle new endpoints and maintain current processes code improvement or fixes.
- Manage and maintain a PostgreSQL database, ensuring data integrity while proactively resolving production incidents and addressing critical data issues .
- Implemented complex data tables and interactive UI elements using Angular Material and AG-Grid tool for banking services.

NTT Data Remote
Centers Sr Developer Sept 2021 – Sept 2022

- Developed an Angular payment gateway wizard for Brilla Group, integrating requests to microservices using reactive response (RXJS) for real-time status tracking.
- Implemented new modules in a fraud detection dashboard for Iberdrola using ng-bootstrap and ngx-datatable to monitor sales and service processes.
- Executed automated unit testing using Karma and Jasmine to ensure code quality within Jenkins and Sonar CI/CD pipelines.

Poder Judicial del Estado de Colima Colima, Col.
Programmer A Jun 2014 – Sept 2021

- Directed the “Desarrollo Tecnológico” department, leading the modernization of institutional systems through REST API architectures with Slim Framework and Angular web clients.
- Launched the “Tribunal Electrónico” platform, enabling electronic notifications and promotions secured by cryptographic digital signatures.
- Migrated the institucional web site to an Angular SPA, integrating a WP API and custom date scheduling service for office capacity control during Covid19 restrictions.
- Operated MySQL databases and Ubuntu servers to maintain availability of the legal and administrative systems.

Inteliglobe Remote

Jr Software Engineer May 2012 – Jun 2014

- Contributed on MVC applications using Java EE 6 with STRUTS for CENEVAL's Optical Process Department, worked in existing Java Beans and JSP views.
- Collaborated on video player annotation tools project using GWT and PostgreSQL to track and measure political mentions in television commercials.

Skills & Interests

Technical:

- **AI-Assisted Development:** GitHub Copilot & Gemini (Code optimization, debugging, and documentation).
- **Frontend:** Angular (Advanced), Angular Material, AG-Grid, RxJS, JavaScript, TypeScript, HTML5, CSS3, ng-bootstrap, ngx-datatable.
- **Backend & Serverless:** Node.js, Express, AWS Lambda (Basic), PHP (Slim Framework, CodeIgniter).
- **Databases & Tools:** MySQL, PostgreSQL, Git, Linux/Ubuntu Server.
- **Testing:** Jasmine, Karma.

Language: Spanish (Native), English (B1 Level - Professional Working Proficiency).
Certifications: Microsoft Certified: Azure Fundamentals , Web Application Developer (APTECH).
Interests: Exploring emerging AI technologies and Cloud services.
